Pinot Bianco

2021

More vintages 2021 - 2020 - 2019

Technical data

Alcohol content: 13,5 % vol Residual sugar: 1,6 g/l Total acidity: 6,0 g/l "Pinot Bianco has always been one of the most important wines at Cantina Terlano; it lends powerful expression to the terroir where our grapes mature. As a varietal, the delicate and above all mineral Pinot Bianco, is a hallmark of the winery." *Rudi Kofler*

Wine

Provenance: Alto Adige Doc denomination: Alto Adige Variety: 100% Pinot Bianco

Vintage: 2021 Yield: 63 hl/ha

Orientation: South - Southwest

Slope: 5 - 70 %

Altitude: 350- 900 m a. s. l.

Vinification

Manual harvest and selection of the grapes; gentle pressing and clarification of the must by natural sedimentation; slow fermentation at a controlled temperature in stainless steel tanks, aging on the lees in steel tanks for 6-7 months.

Wine character

Color: clear pale yellow with a slight greenish shimmer

Smell: On the nose this classic Pinot Bianco scores with crisp notes of apple and pear mingling with aromas of raspberry and lime, plus a touch of camomile and lemon grass to round off the composition

Taste: Body and balance sum up the Pinot Bianco, which intrigues the palate with the fruit of the pear and quince aromas combined with a salty minerality. The wine tickles the tongue and goes on to deliver a persistent aftertaste.

Simple pairings

A good companion with hors d'oeuvres such as salmon and tuna carpaccio; courgette flowers with a stracchino cheese or in combination with burrata; avocado salad; regional dishes like spinach spaetzle or schlutzkrapfen; also in combination with spaghetti alla carbonara; scallops au gratin, and grilled scampi, dentex or sea bream

Kellerei Terlan

Tradition Pinot Bianco

Vintage: 2021

After a snowy winter, spring brought a prolonged period of exceptionally dry weather. Low temperatures in March and April resulted in very late budbreak, which protected our vines from frost damage resulting from the numerous frosty nights in April. A cool and wet May ensured a good water supply for the vines. They began to blossom on the earliest and warmest sites at the end of May to the beginning of June, two weeks later than the long-term average. June was a month of high summer temperatures and little precipitation. As a result, fungal pressure in the vineyards remained very low. July, on the other hand, was marked by heavy precipitation and thunderstorms, which continued into August in places. The average daytime temperatures in August were not too high, which was extremely beneficial in terms of the fruit and vibrant acidity in the 2021 vintage.

On the earliest sites, the grape harvest began slightly late, on September 6, and the weather remained very good almost all the time

The 2021 grape harvest was somewhat smaller in volume. But from the beginning there were indications of a very exciting vintage.

temperature 11,5°C

harvest

06th september 2021

rainfall 769,7 mm

sunshine

Aging

Cool storage at constant temperatures, high level of humidity and as little light as possible

Cellar temperature: 10 - 15 °C

Suggested glass

Glass for a young white wine Serving temperature: 10 - 12 °C

Climate

The high peaks of the main Alpine chain protect South Tyrol from the Atlantic winds and cold northerlies, while the region benefits from the Mediterranean climate from the south. That explains the pronounced differences between day-and night-time temperatures, which are the key to full maturity and elegant wines. To the south, a number of mountain massifs like the Adamello also have a protective function. As a result, annual precipitation is only about one-third of the average for the southern Alpine foothills, and the number of hours of sunshine is higher. The climatic conditions are not unlike those to be found in wine-growing areas like the Swiss Canton Valais.

When the sun rises behind the mountains east of Terlano on one of the year's 300 sunny days, it is already high in the sky as the wine-growing area has a westerly to southwesterly exposure. The lower atmospheric density permits more direct solar irradiation with less diffuse sunlight. That increases the difference between the slopes on the sunny and shady sides of the valley.

Microclimate in Terlano

Continental climate (Cfa Köppen-Geiger)

Annual sunshine hours: Ø 2135 Maximum temperatures: 38,2 °C Average temperatures: 12,9 °C Minimum temperatures: -10,7 °C Annual precipitation: Ø 558 mm Average global radiation: 150,1 W/m²

Winds:

- North foehn: cool and dry down-slope wind
- Ora: valley wind system from the south, bringing in air from the Po Valley

Origin

Alto Adige is one of Italy's smallest wine-growing areas. Located as it is at the interface between the Alpine north and the Mediterranean south, it is also one of its most diverse. Countless generations have shaped Alto Adige as a land of wine, where vines grow on various types of soil and in a range of climate zones at between 200 and 1,000 meters above sea-level. It is the home of authentic wines with a character of their own, with a focus on white wines: About 60 percent of the sites are planted with white varieties and only 40 percent with red.
